B-08

水厂尾水陶瓷膜处理及安全回收一体化装备

Integrated Ceramic Membrane Unit for WTP Residuals Treatment and Safe Recovery

100%

尾水回用

DISCHARGED WATER REUSE RARE

实现供水厂生产废水绿色全回用，零外排

Achieve green and full reuse of discharged water in water plants with zero discharge.

聚焦供水厂尾水全量资源化难题，陶瓷膜一体化尾水处理装备能够有效应对供水厂生产废水水质波动大、水量不连续等挑战，对尾水进行高效处理，将其稳定提升至安全回用标准。出水稳定低于1 NTU,吨水处理成本不超 0.25 元。

Focused on the full resource utilization of discharged water in water plants, this equipment efficiently addresses challenges like unstable water quality and discontinuous flow. It reliably upgrades discharged water to safe reuse standards, achieving a stable effluent turbidity below 1 NTU at a cost of less than ¥0.25 per cubic meter.
