E-11

高光谱水质检测设备

Hyperspectral-based Water Quality Detector

快速、无损、多参数同步监测，实现水质指标精准分析与实时预警

Fast, non-destructive and multi-parameter synchronous monitoring enables accurate analysis and real-time early warning of water quality indicators.

实时监测COD、BOD、浊度、悬浮物、总磷、总氮、氨氮等水质参数。突破传统短板，兼具环保、高效、精准、便捷优势，可根据固定、原位、移动应急等监测场景灵活选择；实现水质监测实时化、自动化、便携化、绿色化，适配多领域监测需求。

It monitors water quality parameters in real time, including COD, BOD, turbidity, SS, TP, TN, NH_3-N. Overcoming traditional limitations, it is eco-friendly, efficient, accurate and convenient. Flexible for fixed, in-situ and mobile emergency monitoring, it achieves real-time, automatic, portable and green monitoring to meet various application needs.

多参数水质监测站

功能全面
值守能力强
可视化操作
集成化程度高

Multi-parameter Water Quality Monitor

Comprehensive functions
Strong unattended capability
Visualized operation
High integration

Water Quality Monitor

Portable & Cost-effective
Fast & Efficient Response
Flexible & Versatile installation
Adaptable for integrated development

水质监测仪

便携经济
响应快速高效
安装灵活多样
适配集成开发

手持水质监测仪

极致便携
检测快速
操作门槛低
数据可追溯

Handheld Water Quality Monitor

Ultra-portable
Rapid detection
Easy operation
Data traceability
